

May 2024

Dear Parents/Guardians,

This letter is to inform you that we have a student within the school who has life threatening food allergies to nuts. The food allergies are severe and exposure in any form (skin contact or ingestion) to these substances could result in anaphylaxis, a potentially fatal condition that requires immediate medical attention. For the safety of the student we are re-iterating restrictions school. We are asking parents/guardians to be extra conscientious in the selection of snacks/ foods that your child brings to school in an attempt to limit the chances of this child being exposed to nuts.

Children must not bring in food with a label on that says:

- Contains nuts or may contain nuts

Children can bring food in with a label on that says:

- May also contain nuts or may contain a trace of nuts

Thank you in advance for making the school environment a safe and healthy place for the students. By working together, we can make a difference for our children.

Kind regards,

Gemma Spence
